FOR HOUSEHOLD USE ONLY
SAVE THESE INSTRUCTIONS
SHORT CORD INSTRUCTIONS
A short power-supply cord is provided to reduce risks resulting from becoming entangled in or tripping over a longer cord.

Longer extension cords are available and may be used if care is exercised in their use.

If an extension cord is used, (1) the marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance, and (2) the longer cord should be arranged so that it will not drape over the counter top or table top where it can be pulled on by children or tripped over.

POLARIZED PLUG
This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug is intended to fit into a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to modify the plug in any way.

OPERATING INSTRUCTIONS

BEFORE USING

1. Carefully unpack the Slow Cooker.

2. Wash Stoneware Liner and Glass Lid in warm, soapy water. Rinse well and dry thoroughly.

3. Wipe interior and exterior surfaces of the Chrome Base Unit with a soft, moist cloth to remove dust particles collected during packing and handling. NEVER IMMERSE THE BASE UNIT IN WATER.

4. It is necessary to operate the Slow Cooker once before initial use. After cleaning the Slow Cooker, place Stoneware Liner inside the Base, then pour 4 cups of water inside the Stoneware Liner and cover with Glass Lid. Plug Slow Cooker into electrical wall outlet and set Power Switch to HIGH. Allow Slow Cooker to operate for approximately 30 minutes. You will notice a slight odor; this is normal and should quickly disappear.

   After 30 minutes, switch OFF and unplug from electrical wall outlet. Allow to cool for about 20 minutes, then uncover, remove Stoneware Liner from the Base and pour out water. Rinse the Stoneware Liner, dry thoroughly and place it back inside the Base.

INTRODUCTION TO SLOW COOKING

Slow cooking occurs at temperatures just around boiling point. Since liquids do not boil very quickly at this temperature, there is just a little steam and evaporation, foods do not stick and virtually no stirring is required.

The cooker can operate on LOW all day and night if required. When cooking on a high setting, it is very much like a covered pot on the stove top. Foods will cook in half the time required for LOW cooking. Additional liquid may be required as foods do boil on HIGH.

Note: Lid must not be removed while cooking on LOW setting.
HOW TO USE THE AUTO FEATURE

AUTO allows you to prepare meals in less time than it would take on LOW, but not as quickly as on HIGH, allowing more time for unsupervised cooking. When set on AUTO, the Slow Cooker begins cooking on HIGH. Once the HIGH temperature is reached, it then switches automatically to LOW. When using the AUTO cycle, you are able to initially heat the food faster, shortening the standard cooking time required for LOW by approximately 25%.

COOKING IN YOUR SLOW COOKER

1. Prepare recipe according to instructions.

2. Place food in Stoneware Liner and cover with Glass Lid. Do not fill the Slow Cooker to the brim with food. Always cook with the Lid on and the Stoneware Liner in position. Remember that frequent lifting of the Lid during cooking delays the cooking time. When cooking a meat and vegetable combination, place the vegetables in the bottom of the Stoneware Liner first. Then add the meat and other ingredients. Before cooking frozen food, add some warm liquid. If the Liner is hot, do not add cold food. The Stoneware Liner CANNOT stand the shock of sudden temperature changes.

3. Plug cord into a 120V AC outlet.

4. Select temperature setting: LOW, HIGH or AUTO.

5. Cook according to recipe instructions.

CAUTION: Outer Liner will get very warm during cooking. This is where the two heating elements are located. Use pot holders or oven mitts when moving or handling the unit.

6. When cooking time is complete, turn the Power Switch to the OFF position, and unplug the Slow Cooker from the electrical wall outlet. Remove Glass Lid.

CAUTION: To remove the Glass Lid, grasp the Knob and lift the Lid just a bit — just enough to allow steam to escape — before completely removing the Lid.
COOKING IN YOUR SLOW COOKER  (Continued)

7. Allow a few seconds for all steam to escape, then carefully remove the Stoneware Liner from inside the Base.

CAUTION: Use oven mitts to remove Stoneware Liner. (As shown in Figure 2.)

NOTE: If you are moving the Slow Cooker, grasp the unit by the Handles; use pot holders or oven mitts. Even when switched off, and unplugged, the Slow Cooker remains hot for some time after using; set aside and allow unit to cool before cleaning or storing.

CONVERTING STANDARD RECIPES TO SLOW COOKING

- Vegetables such as carrots, potatoes, turnips and beets require longer cooking time than many meats. Be sure to place them on the bottom of the Slow Cooker and cover them with liquid.

- If adding fresh milk or yogurt, this should be done during the last 2 hours. Evaporated milk may be added at the start of cooking.

- Rice, noodles and pasta are not recommended for long cooking periods. Cook them separately and then add to the Slow Cooker during the last 30 minutes.

USER MAINTENANCE INSTRUCTIONS

PRECAUTIONS

Do not use Stoneware Liner to store food in the refrigerator, and then reheat in the Heating Base. The sudden temperature change may crack the Liner.

Please handle the Stoneware Liner and Glass Lid carefully to ensure long life.
USER MAINTENANCE INSTRUCTIONS (Continued)

Avoid sudden extreme temperature changes. For example, do not place a hot Glass Lid or Stoneware Liner into cold water or onto a wet surface.

Avoid hitting the Stoneware Liner and Glass Lid against the faucet or other hard surfaces.

Do not use Stoneware Liner or Glass Lid if chipped, cracked or severely scratched.

Always unplug the unit from the electrical wall outlet when not in use and before cleaning.

TO CLEAN

This appliance should be cleaned after every use. Unplug the unit from the wall outlet. Never immerse Chrome Base Unit or cord in water. Allow the unit to cool before cleaning.

Wash Stoneware Liner and Glass Lid in warm, soapy water. Rinse well and dry thoroughly. If food sticks to the surface of the Stoneware Liner, fill it with warm, soapy water and allow it to sit for a few hours before cleaning.

Wipe interior and exterior surfaces of the Base unit with a soft, slightly damp cloth or sponge.

CAUTION: Never use abrasive cleansers or scouring pads to clean the Stoneware Liner or Chrome Base Unit, as these can damage the surfaces.

TO STORE

Be sure all parts are clean and dry before storing. Store appliance in its box or in a clean, dry place. Never store it while it is hot or wet. To store, place Stoneware Liner inside the Base and the Glass Lid over the Stoneware Liner; to protect the Glass Lid, it may be wrapped with a soft cloth and placed upside down over the Liner. Never wrap cord tightly around the appliance; keep it loosely coiled.
